

The Harmonic Mixing Cheat Sheet

Which keys mix, which clash — and the exact move to get from any track to the next.

THE FIVE MOVES — THAT'S 90% OF HARMONIC MIXING

- 1 Same number 8A → 8A**
Perfect blend — the safest mix there is.
- 2 +1 up the wheel 8A → 9A**
Lifts the energy (a perfect fifth). The classic build.
- 3 -1 down the wheel 8A → 7A**
Softens it, drops the energy gently.
- 4 Same number, swap letter 8A → 8B**
Mood flip — minor to major, or back.
- 5 +2 up the wheel 8A → 10A**
A bigger, bolder energy jump for peak time.

Know your tracks' keys, follow the wheel, and it just sounds **right**.
